

Pealight Starcloth

For a complete transformation of the visual appearance of a venue, starcloths are a cost effective way to add the "wow" factor to any event. We are able to provide our clients with systems that are either 4-channel controllable or static. When supplied in the controllable format the starcloths are synchronised together and using computer generated programs can provide a wide range of visual effects, ranging from slow cross fades through to full scale ballistic chase patterns. Clients can also opt for coloured lamps instead of white and this option allows for the cloths to match the colour theme of the event.

Starcloths are available in a wide range of sizes, all of which can be joined together using hook and loop fastenings to create areas of very large coverage.

The combination of a low voltage system together with a UK patented design of lamp holder makes S+H starcloths the World's leading starcloth system.

The World's most advanced,
User-Friendly starcloth

Our starcloths have been extensively used by clients such as the BBC and ITV. Below is a selection of the programmes on which they have featured.

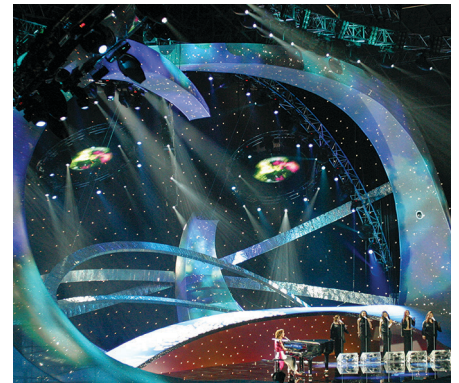

Royal Variety Performances
National Lottery: Launch & Guesstimation
Paul Daniel's Secrets
Blankety Blank

Children In Need
Blue Peter
Soap Awards
Strictly Come Dancing
