

# Pealight Strings

Technical Support Limited

Using the same technology as the S+H Starcloths the pealight curtain offers a realistic alternative to dressing when normal hangings are impossible. They are ideal for tricky contours of stairwells or where decorative mouldings prevent normal attachment.

## Pealight Canopy

The Pealight Canopy is ideal where a room has a very high ceiling. From a centrally positioned ring, pealight strings radiate outwards towards the walls. Once this unit is installed a guests perception of the room height is drastically altered.

### Technical Information:

- 28V Lamps in a variety of colours
- 240mm Lamp Spacing
- Cable Spacings 150 or 300 mm
- 1 - 12m Drops Possible
- Stand-Alone or DMX Control

...a Realistic Alternative to  
Dressing a Venue in Drapes  
or Starcloth.
